

Photoshop for the Classroom - Day 2

This course will teach you more advanced Photoshop techniques through set class tasks that can then be delivered to students back in your school. It is aimed at people who have been on the Day 1 course or who are already familiar with the basics of Photoshop.

Students that show a confident use of Photoshop will not only be gaining high grades but will be producing work that is of excellent quality. This course is designed to give you the skills to teach Photoshop with much more knowledge and creativity. On this course you will build on the skills learnt from the day one course by learning about blend modes, adjustment masks, colour grading, blending exposures and much more. All this will be put together in manageable class tasks that are proven to engage students and get high results. These tasks can then be delivered, by you, back in your school.

All of this will be backed up with a wealth of excellent resources that you can use back in your classroom to enable students to get maximum results in the use of Photoshop.

N.B. Before booking on this course please make sure you are confident with all the Photoshop skills covered on our Day 1 course.

- Heads of faculty.

Your Course Leader

Marc Newton is an Advanced Skills teacher in Photography and has been teaching Art and Photography since 2002. He has over 10 years' middle management experience and through his leadership and teaching techniques he consistently achieved some of the highest Photography GCSE results in his county and his lessons were graded as Ofsted Outstanding.

He is an award winning professional Photographer working in the London and Essex areas of the UK. Graduating with an honours degree in Fine Art Photography in 2000 his work ranges from social documentary projects to landscapes and more recently pinhole photography. He exhibits much of his art around London and the UK and has his work published in books and magazines. He is also the founder of www.theschoolofphotography.com.
